

LETTER FROM HUMLA FUND PRESIDENT:

April 28, 2015

Dear Humla Volunteers,

I am writing to let you know that our mission to Humla in September is going forward and that the need for your service this year is more vital than ever!

Thankfully, the Humla District was not effected by the recent earthquake. Being one of the poorest and most remote districts in Nepal, however, the little support Humla ordinarily receives from the Nepali government will be even more curtailed this year and for the next few years as the country's scarce resources are focused in Kathmandu.

I want to assure you that Humla Fund is strongly committed to fulfilling our mission of strengthening the Bon culture and traditions in the Humla region of Nepal through access to quality education, healthcare and sustainable economic development. The Humla community is relieved and deeply grateful to know that our medical clinics will continue this year.

It is an extraordinary and profound heart connection that we all share with this beautiful part of the world. We are grateful and inspired by your support and commitment to be of service with us.

Thank you for being an integral part of caring for one another in the world and making a difference!

All the best,
Heidi Harding
